

Možne kombinacije debeline žice in velikosti okenc mreže glede na material.

### Svetlo vlečena žica

| Velikost okenc (mm) | Debelina žice (mm) | Specifična masa (kg/m <sup>2</sup> ) | Občasno na zalogi        |
|---------------------|--------------------|--------------------------------------|--------------------------|
| 15 × 15             | 2.0                | 3.10                                 | 1000 × 2000              |
| 15 × 15             | 2.5                | 4.70                                 | 1000 × 2000              |
| 20 × 20             | 2.5                | 3.70                                 | 1000 × 2000              |
| 20 × 20             | 2.8                | 4.60                                 |                          |
| 24 × 24             | 2.5                | 3.20                                 | 1000 × 2000              |
| 24 × 24             | 2.8                | 4.00                                 |                          |
| 30 × 30             | 3.1                | 3.70                                 | 1000 × 2000              |
| 30 × 30             | 3.4                | 4.65                                 |                          |
| 40 × 40             | 3.1                | 2.90                                 | 1000 × 2000              |
| 40 × 40             | 3.4                | 3.50                                 |                          |
| 40 × 40             | 3.8                | 4.00                                 | 1000 × 2000              |
| 50 × 50             | 3.4                | 2.70                                 |                          |
| 50 × 50             | 4.0                | 3.90                                 | 1000 × 2000; 1250 × 2500 |
| 75 × 75             | 4.0                | 2.70                                 |                          |

### Pocinkana žica

| Velikost okenc (mm) | Debelina žice (mm) | Specifična masa (kg/m <sup>2</sup> ) | Občasno na zalogi |
|---------------------|--------------------|--------------------------------------|-------------------|
| 15 × 15             | 2.0                | 3.10                                 | 1000 × 2000       |
| 20 × 20             | 2.2                | 2.80                                 |                   |
| 20 × 20             | 2.5                | 3.70                                 | 1000 × 2000       |
| 24 × 24             | 2.5                | 3.20                                 | 1000 × 2000       |
| 30 × 30             | 3.1                | 3.70                                 | 1000 × 2000       |
| 40 × 40             | 3.1                | 2.90                                 | 1000 × 2000       |
| 40 × 40             | 3.4                | 3.50                                 |                   |
| 40 × 40             | 3.8                | 4.00                                 |                   |
| 50 × 50             | 3.4                | 2.70                                 |                   |
| 50 × 50             | 4.0                | 3.90                                 |                   |
| 75 × 75             | 4.0                | 3.70                                 |                   |

Možne kombinacije debeline žice in velikosti okenc mreže glede na material.

### Nerjavna žica

| Velikost okenc (mm) | Debelina žice (mm) | Specifična masa (kg/m <sup>2</sup> ) | Občasno na zalogi |
|---------------------|--------------------|--------------------------------------|-------------------|
| 10 × 10             | 1.5                | 2.55                                 | 1000 × 2000       |
| 15 × 15             | 1.5                |                                      | 1000 × 2000       |
| 15 × 15             | 2.0                | 3.10                                 | 1000 × 2000       |
| 20 × 20             | 2.0                | 2.25                                 |                   |
| 20 × 20             | 2.5                | 3.70                                 | 1000 × 2000       |
| 24 × 24             | 2.5                | 3.20                                 |                   |
| 30 × 30             | 2.5                | 2.40                                 |                   |
| 30 × 30             | 3.0                | 3.60                                 |                   |
| 40 × 40             | 3.0                | 3.50                                 |                   |

### Aluminijasta žica

| Velikost okenc (mm) | Debelina žice (mm) | Specifična masa (kg/m <sup>2</sup> ) | Občasno na zalogi |
|---------------------|--------------------|--------------------------------------|-------------------|
| 10 × 10             | 1.8                | 1.30                                 | 1000 × 2000       |
| 15 × 15             | 1.8                | 0.90                                 | 1000 × 2000       |
